
Season-clustered 95% CIs; models with country and season fixed effects except * (country fixed effects only). Humidity anomalies of windows anchored to onset or median week are daily anomalies against the same calendar week. Data: WHO FluNet 2010/11–2019/20 and 2022/23–2024/25, 22 EU/EEA countries; ERA5 via Open-Meteo at capitals.
